Dear Josh:

Many thanks for your comments of January 19th concerning ice on the moon. I have sent a copy of the manuscript to Abelson. We are now constructing a model which is applicable to Mercury as well as to the Moon and in addition to satellites of other planets. When it is completed I will send you a copy. In addition, there should of course be moisture at depth as you suggest.

With all warm wishes,

Sincerely,

A handwritten signature in cursive script that reads "Harrison".

Harrison Brown
